Uttarakhand 2022 Electoral Data Top 10 Highlights

**Note: Data Analysis based on Voter Turnout App of Election Commission as of
6 P.M on February 15, 2022**

SDC Foundation
Dehradun, Uttarakhand
www.sdcuk.in

Notes:

1. The below mentioned highlights are prepared based on the district and assembly wide constituency data in the Voter App of the Election Commission.
2. We have taken the 2022 data as of 6.00 PM on Tuesday, February 15, 2022.
3. The final numbers are likely to change further.

Top 10 Highlights

1. As informed by Uttarakhand authorities the voting percentage was 65.1% as at the end of day, February 14, 2022. However, the voter turnout app of the Election Commission is showing 64.29% voting as of 6.00 PM on February 15, 2022. The voting turnout in Uttarakhand in the 2017 Vidhan Sabha election was 65.6%.
2. The highest polling percentage was in the districts of Haridwar (74.06%), Udham Singh Nagar (71.45%), and Uttarkashi (67.32%).
3. The lowest polling percentage was in the hill districts of Almora (52.82%), Pauri (53.14%) and Tehri (55.57%).
4. Haridwar Rural (81.25%), Laksar (79.01%) and Jwalapur (78.90%) in the plain district of Haridwar were the three constituencies with the highest voting turnout in Uttarakhand. Thus, voter turnout was in 79-81% range in the three constituencies.
5. Salt (44%) in Almora district and Chaubatakhal (44.27%) and Lansdowne (46.04%) in Pauri district had the lowest voter turnout. Thus, voter turnout was in the 44-46% range in the three constituencies.
6. With 49.23% & 49.73% voting turnout, Pratapnagar and Ghansali in Tehri district also had a voting percentage below 50%. Thus, there were five hill constituencies in the state with voter turnout below 50%.
7. 82% hill constituencies (28 out of 34) in the nine hill districts had a vote share that was lower than that of the state average of 64.29% as per the voter turnout app.
8. Four constituencies in the city of Dehradun viz. Mussoorie, Dehradun Cantt, Rajpur Road and Dharampur had voting below 60%.
9. In most hill constituencies, the total average number of voters is in the 50000 to 65000 range. The total electors are quite low in the hill constituencies and on top of that, the vote share is very low. While this needs further examination and ground research; it can be safely assumed that one of the biggest reasons for the low voter turnout in the hill districts is migration.
10. The Election Commission needs to evaluate its own performance as to why the voting continues to be low in Uttarakhand. There is stagnation in voting since the 2012 elections. The Election Commission needs to relook at the election date/day in the state, engage with all stakeholders and should do targeted campaigns to increase vote shares. It also needs to look at innovative practices to increase voting particularly in the hill constituencies.
